

FortiClient EMS Administrator

Course Description:

In this course, you will learn how to use the FortiClient EMS features, provision FortiClient endpoints, integrate the FortiClient EMS Security Fabric, and deploy and configure the zero trust network access (ZTNA) agent and endpoint security features. Learning these product fundamentals provides you with a solid understanding of how to deploy, manage, and maintain endpoint security using FortiClient EMS.

Course Duration:

2 days

Certification:

This exam is part of the FCP Network Security certification track..

Prerequisites:

A basic understanding of endpoint protection solutions.

Outlines:

1. Fortinet Endpoint Security
2. System Administration
3. FortiClient Deployment
4. Provisioning
5. Advanced Profile Configuration
6. ZTNA
7. ZTNA Deployment
8. Security Incident Response
9. Troubleshooting
10. FortiClient Cloud

Objectives:

After completing this course, you will be able to:

- Understand the purpose of FortiClient EMS and identify FortiClient EMS components
- Understand FortiClient EMS administration
- Identify and explore FortiClient editions
- Understand FortiClient installation
- Identify FortiClient features and settings
- Provision and deploy FortiClient using FortiClient EMS
- Explore different deployment methods and types
- Understand and configure endpoint policies and profiles
- Understand the use of the ZTNA
- Configure and deploy FortiClient ZTNA solution

- Understand compliance verification rules and manage tags
- Explore diagnostic tools and troubleshooting of FortiClient and FortiClient EMS
- Understand FortiClient Cloud requirements and administration
- Understand FortiCloud endpoint deployment and management

Who should attend

IT and security professionals involved in the management, configuration, and administration of FortiClient EMS endpoints used to secure devices for their organizations should attend this course. Participants should have a thorough understanding of endpoint solutions.
