

Prisma Access SSE: Configuration and Deployment

Course Description

The Prisma Access SSE: Configuration and Deployment course introduces you to the operational deployment of Prisma Access Secure Access Service Edge (SASE) and how it helps organizations embrace the needs of the modern workforce by providing network connectivity and network security services from the cloud. This course will enable you to deploy, configure, maintain, and troubleshoot Prisma Access using Strata Cloud Manager. The course is intended for professionals in cybersecurity and public-cloud security, as well as general network-security professionals who want to learn how to secure remote networks and mobile users.

Prerequisites

Prerequisites Participants should have a basic knowledge of cloud computing and public cloud and experience with networking concepts, including routing, switching, and IP addressing. In addition, participants should complete the following pre-requisites to be optimally prepared for the course:

- Prisma Access (Strata Cloud Manager) digital learning paths
- (Recommended) Firewall Essentials: Configuration and Management or equivalent experience.

Course Duration

4 days

Objectives

Successful completion of this four-day, instructor-led course will help enhance your understanding of how to better protect your applications, remote networks, and mobile users using a SASE implementation. In a lab environment, you will get hands-on experience configuring, managing, and troubleshooting Prisma Access via Strata Cloud Manager.
