

SC-300T00: Microsoft Identity and Access Administrator

Course Description

The Microsoft Identity and Access Administrator course explores how to design, implement, and operate an organization's identity and access management systems by using Azure AD. Learn to manage tasks such as providing secure authentication and authorization access to enterprise applications. You will also learn to provide seamless experiences and self-service management capabilities for all users. Finally, learn to create adaptive access and governance of your identity and access management solutions ensuring you can troubleshoot, monitor, and report on your environment. The Identity and Access Administrator may be a single individual or a member of a larger team. Learn how this role collaborates with many other roles in the organization to drive strategic identity projects. The end goal is to provide you knowledge to modernize identity solutions, to implement hybrid identity solutions, and to implement identity governance.

Course Duration

4 days

Prerequisites

- SC-900T00: Microsoft Security, Compliance, and Identity Fundamentals
- AZ-104T00 - Microsoft Azure Administrator

Course Outline

- Explore identity in Microsoft Entra ID
- Implement an identity management solution using Microsoft Entra ID
- Implement an authentication and access management solution
- Implement access management for apps
- Plan and implement an identity governance strategy

Who Should Attend

This course is for the Identity and Access Administrators who are planning to take the associated certification exam, or who are performing identity and access administration tasks in their day-to-day job. This course would also be helpful to an administrator or engineer that wants to specialize in providing identity solutions and access management systems for Azure-based solutions; playing an integral role in protecting an organization.
